

# “Compact 3+1” Gun safety cabinet with double bit key operated lock

## Item no. 4430

- Steel structure in compliance with UNI EN 10130, optimized spaces, 1.5 mm thick. Rounded edges to avoid abrasion. Two holes on the rear for fixing to the wall.
- Door rebated on three sides; pull-resistant hinge side. Steel door back cover 2 mm thick.
- Steel made rotating deadbolts resistant to attack: 2 horizontal Ø 18 mm and 2 vertical Ø 18 mm.
- 6 gorges, two throws lock, with a high number of possible combinations. Equipped with two double bit nickel plated keys.
- Capacity:  
**3 independent guns housing, with barrel support on the bottom; or 4 guns housing at close range, with barrel support mounted on one side.**
- **Optional:**  
On request:  
the cabinet painted with a technique providing an elegant “wood colour” finish (add “.L” at the end of the item code).

Steel shelf for ammunitions/objects, welded to the body

High concentration and scratch-proof polyethylene gun housing and rack (increased in thickness, that provides the perfect setting of single or double-barreled rifles, even with optical)
