

“Compact” Gun safety cabinets with electronic combination lock

Items no. 4440.T5 and 4440.T10

- Steel structure in compliance with UNI EN 10130, 1.5 mm thick. Rounded edges to avoid abrasion. Two holes on the rear for fixing to the wall.
- Door rebated on three sides; pull-resistant hinge side. Steel door back cover 2 mm thick. Knob with programmed breakage steel shaft: if forced, the knob will break before the mechanism. Emergency opening through a special profile key and protected cylinder. Equipped with 2 special profile emergency keys.
- Steel made rotating deadbolts resistant to attack: 2 horizontal Ø 22 mm and 2 vertical Ø 22 mm.
- ADA compatible keypad with Braille markings and sound confirmation. LED indicators confirm if operations are correct or wrong, if a new code has been set and alert when batteries are almost empty. Code (from 3 to 8 digits) can be changed only when door is open.
- Capacity:
5 guns housing for item no. 4440.T5
10 guns housing for item no. 4440.T10

- **Optional:**

On request:
the cabinet painted with a technique providing an elegant
“wood colour” finish (add “.L” at the end of the item code).

Safety box for ammunitions/objects equipped with a Fai by Viro lock, supplied with 2 keys

Low consumption electronic board. Internal power supply (4 alkaline 1.5V batteries). Non-volatile memory: the stored codes are not erased when power supply is removed. High concentration and scratch-proof polyethylene gun housing and rack (increased in thickness, that provides the perfect setting of single or double-barreled rifles, even with optical)

ITEM NO.	CAPACITY	EXTERNAL DIMENSIONS cm. H x W x D	INTERNAL DIMENSIONS cm. H x W x D	UNIT WEIGHT kg.	PACKING VOLUME m ³
