

ARMOURED LOCKS FOR ROLLER SHUTTERS

WITH PULL-RESISTANT AND ANTI-DRILL SECURITY ESCUTCHEON SUITABLE FOR PROFILE CYLINDER

only you decide

when OPENING IT

THE NEW AND EXCLUSIVE 8270 SERIES LOCKS ARE INTERCHANGEABLE WITH THE MOST COMMON ROLLER SHUTTER LOCKS ALREADY INSTALLED, BY SIMPLY ENLARGING THE CYLINDER HOLE TO HOUSE THE SECURITY ESCUTCHEON.

Enterely galvanized and corrosion-proof

Watch the video of the armoured lock for roller shutter

Sturdy deadbolts made of galvanized steel sheets, 7 mm overall thickes.

mm overall thickness

Suitable for any double or half profile cylinder with DIN or universal cam, and 30 mm escutcheon side (external)

Supplied with:

- loose pins;
- nickel-plated brass escutcheon with esthetic function for the security escutcheon;
- galvanized steel dowel for fixing cylinder and relative Allen key;
- case-hardened, tempered, galvanized fixing screws with pull resistant head;
- installation note with drilling template.

On request:

- versions with longer deadbolts (70 mm instead of 43 mm), total projection 24 mm;
- · accessory for the realization, along with hole saw, of the security escutcheon's hole (usable for the installation of the most common security escutcheons on doors set up for profile cylinder).

Galvanized steel external protection plate 2,5 mm thick

SECURITY ESCUTCHEON

Installed on the lock, and inserted from the inside to the outside of the lock, with larger base of the through hole, to resist to pull attempts.

Made of case-hardened, tempered, copper and nickel-plated steel, with 7 mm rotating plate.

Burglar-resistant protection

Forcing resistant with scaffolding pipe

Anti-drill protection

SERIES 8270	ITEM. No.	Dimensions mm A x B	Case height mm C	Unit weight g	Pieces per pack No.
Central	8271	160 x 60	22	1250	1
Right or left side	8272	160 x 60	22	1150	1
Pairs	8272/8272	160 x 60	22	2200	1

N.B. The locks, standard, are supplied without cylinder. For having them with nickel-plated half cylinder 40 mm (30+10), add code 1.772.9 after the item code (pairs of locks are supplied with two
